

To whom it may concern,
I am a concerned XM subscriber and use the weather and traffic channels referred to in NAB's petition 04-160. XM offers a quality alternative to what has become the monopoly of commercial radio. To enact NAB's petition 04-160 would be to put XM at a distinct disadvantage to competing with these monopolies. These monopolies were formed under the guise of free trade, and it's hypocrisy to seek regulation as protection from fair and free competition. It would be a disappointment to see NAB's petition 04-160 enacted.

Thankyou.
Anthony J. Ritz
